

## FLT893 Float Switch

### Specifications:

Float:	Polypropylene Foam
Stem:	Polypropylene
Washer:	Silicon
Clip:	Polypropylene
Leads:	22 gauge, 12" length
Top Fill:	Epoxy
Temperature:	+80°C
Contact rating:	50W

### Operation:

Normally-closed. When the float drops toward the bottom clip, the internal reed contacts draw together and complete a circuit. When the float rises, the contacts separate and open the circuit.

This can be reversed by removing the float, inverting it and replacing.
